Time: 30 min

Course Title: Cloud Computing Course Code: CC 483

1. A healthcare organization stores patient records in a public cloud. The organization is concerned about data encryption, data location and sovereignty, and compliance with healthcare regulations. Why are these three issues critical for the organization? 7.5

2. Defining the Cloud, from an Economic Viewpoint. An IT training institute is conducting a one-year training program. The institute requires 3 computers throughout the year for administrative work. During special training sessions, the computer requirement increases to 8 PCs on 12 February, 15 PCs on 18 June, and 25 PCs on 22 October. Each computer costs Tk. 55,000 to purchase. Alternatively, computers can be rented at a rate of Tk. 550 per PC per day. Analyze whether purchasing the computers or renting them when demand increases is the more economical option. Justify your answer. 7.5
